

Architecture:

1. **Main Application** (`main.py`):
 - Handles the overall CLI logic.
 - Manages the main loop and user interactions.
2. **Contact Management** (`contact.py`):
 - Defines the `Contact` class.
 - Contains functions to display and search contacts.
3. **Save Option** (`save.py`):
 - Handles loading and saving contacts from/to a CSV file.
4. **Validation** (`valid.py`):
 - Provides input validation functions.
